Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 22 is objected to because of the following informalities: Claim 22 is provided with the wrong status identifier, it is listed as being withdrawn. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 32 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement.

In claim 32 there is no antecedent basis for the "wire cloth filter".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 32 and 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Melton '542.

There is disclosed in Melton a beverage brewing and drinking cup with filter assembly, comprising: a beverage cup assembly 12; a frame 20 at the top of the

beverage cup assembly; a filter 18 positioned within the frame, wherein beverage particles (T) are received into an open top end of the filter; and a top lid 50 covering the frame and the filter, the top lid having a drinking hole 66 passing therethrough.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Melton '542 in view of Ziemek.

Ziemek discloses that it is known in the art to construct a filter of a wire mesh and to coat the wire mesh with a gold plating.

It would have been obvious to one skilled in the art to modify the filter of Melton with that taught by Ziemek and construct it of a wire mesh having a gold plating, in order to increase the life of the filter.

In regards to the claimed density of the filter, it would have been obvious to one skilled in the art to construct the prior art filter within the recited strands per inch range, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
